

1.1 WELCOME TO GREENBLOCK

Welcome to Greenblock

Greenblock Insulated Concrete Forms have been used in thousands of structures across North America over the past two decades. Known as “The Original ICF”, Greenblock has a proven track record and a history of exceptional design, quality and service. The Greenblock design originated in Europe over forty years ago and was introduced to North America in 1987. This original Greenblock design, with some integral modifications, has been optimized to provide construction professionals with energy efficient and disaster resistant, high performance building envelope solutions.

Today’s Greenblock is bigger and better than ever. Our extensive product line consists of both fixed-web and assemble-on-site fully compatible systems making it one of the most versatile ICF blocks in the industry. And, Greenblock is the *only* ICF company to offer professional, in-house installation services*.

Insulated concrete form construction is the perfect choice for residential and commercial builders who want to build safe, strong, energy-efficient and *sustainable*. For *Green Builders*, insulated concrete forms can put you well on your way to achieving green certification for your projects.

Take a look around and compare our products and services and we hope you’ll agree that Greenblock Insulated Concrete Forms are the right building envelope solution for your next home or building project.
