

## 3.19 SIMPSON LEDGER CONNECTOR SYSTEM

# Simpson Ledger Connector System

Simpson Strong Tie's ICFLC and ICFLC-W ledger connector system is designed for mounting wood or steel floor ledgers to ICF walls. Perforations in the embedded leg (ICFLC) allows concrete to flow around it securing it in the wall. The exposed flanges provide a structural surface to attach the ICFLC-W and a wood or steel attachment.

- Snap chalk lines, top and bottom, for proposed ledge
- Mark locations for ICFLC Brackets
- Cut vertical kerfs as marked for ICFLC Brackets
- Insert ICFLC
- You can either glue ICFLC to block or strap across it to hold it in place during the pour
