

3.4 PLAN REVIEW

Plan Review

When reviewing plans indicate a Point of Beginning (POB) and work around the plan from that point.

- Helps reduce the possibility of overlooking items such as windows, doors, and other wall penetrations
- Provides consistent point of reference
- Provides reference for linear dimensions

Calculate method for window/door buck installations

- Where in the wall is the window to be orientated?
 - To the middle of the wall?
 - To the outside of the wall?
 - Other?
- What material is to be used for the bucks?
 - Wood?
 - Vinyl?
 - Other?

Double check window rough opening sizes

Be sure to calculate "shim" room as needed

Calculate wall alignment on footing/slab

Review step footing, gables, pilasters, buttresses and interior wall block requirements.

Determine method of bottom course attachment to footing/slab

- Kick plates
- Inside
- Outside

Adhesive (compatible; water based)

- Foam
- F2F
- Great Stuff
- Other

Review step footings, gables, palasters, buttresses and interior wall block requirements.
